Listened in on a call for the HQ RSC Coordinators:

- EOC has been stood up all week for the abandoned mine spill response in Regions 8, 6, and 9 "Gold King Mine Spill."
- All NICT members were asked to offer up assistance for EOC staffing and Lee responded with offer of several experienced staffers
- As early as this next Monday, the RSC may be asked for volunteers to come down and

help.

- EPA internal UC set up for 3 Regions, and 6 drinking water teams have been deployed, 9 surface water and sediment sample collection teams are out. The Agency is also trucking in clean water for livestock and agriculture.
- Craig Beasley said we could pop down and see the operations in the EOC if we like ☺ And based on the anticipated work needed in the Regions, the EOC will be running for at least the next few weeks.
- RSC refresher training sessions will be set up for next month, to be announced.
